## Education

**B.Tech in Artificial Intelligence and Data Science – St.Joseph’s College of Engineering, 2028**

Relevant coursework: Python Programming

## Skills

**Programming Languages:** Python, Java, (learning TypeScript)

**Tools & Technologies:** Git, SQL, Docker, (AWS/GCP planned)

**Interests:** Software Engineering, Machine Learning, MLOps

## Projects

### **Project 1: Full-stack Web App (Planned)**

Description: A basic application with authentication, REST APIs, PostgreSQL database, and deployment.

### **Project 2: End-to-End ML Pipeline (Planned)**

Description: Machine Learning model training, versioning, and deployment as an API service with monitoring.

## Achievements & Activities

- Placeholder for Kaggle notebooks, Open Source Contributions, Certifications
- Will update as I progress
